

We can't wait to meet you!

Android Developer (m/f/d, full-time/part-time/student-job)

Job Specifications:

We're looking for an Android developer who will take a key role in our young international team and will be responsible for:

- Design and build applications for Android devices on the Android platform.
- Maintain quality and ensure responsiveness of applications.
- Collaborate with the rest of the engineering team to design and launch new features.
- Maintain code integrity and organization.

Required Qualification

- Experience with **Android SDK** and multiple versions of Android.
- Experience with Android framework, as well as offline storage, and performance tuning.
- Must be familiar with **RESTful APIs** to connect Android applications to back-end services.
- Experience with Android UI principles and best practices.
- **Nice to Have:** Experience with Speech-to-text, OCR/Barcode scanners, WebRTC, SignalR and Version control management (Git).

Please send your application to the following email: talents@dropslab.com

Dropslab Technologies develops an assistance software, which provides real-time guidance to frontline workers directly in their line-of-sight using smart devices such as smart glasses and smartphones. The goal of our solution is to guide workers in industrial environments by providing them context-related information for changing processes and situations. This real-time guidance allows employees to perform tasks faster, without breakdowns & less error.

(Working environment: Remote/hybrid)
